2017 ZJUBTV Internal Course Week2

Learning Resource:

1. Official Website of Bootstrap: http://www.bootcss.com/

Tips: This website contains the introduction of Bootstrap and the usage of it. It contains the example code in the website, you can copy it into your own code so as to know what does the Bootstrap look like in the webpage. This website can be used as a manual of Bootstrap. If you can not access this website, please visit http://v3.bootcss.com/ instead.!
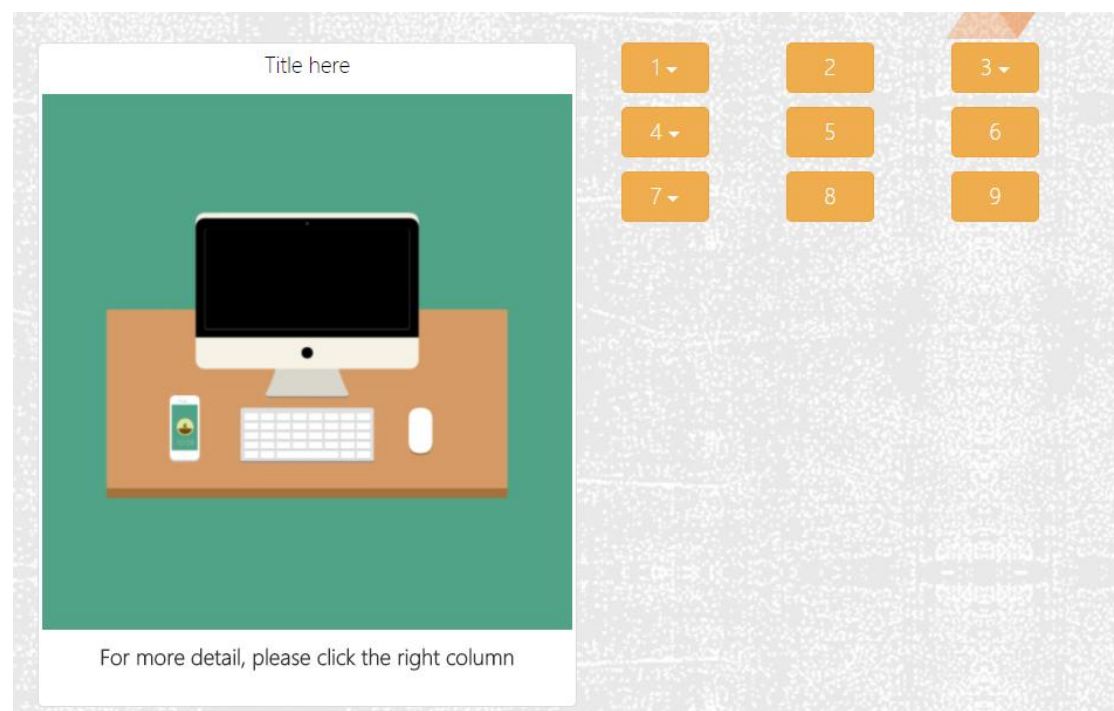

2. Video from Imooc: http://www.imooc.com/learn/141

Tips: It's not recommended to learn Bootstrap by watching video since it wastes so much time. But you can watch the first chapter of the video to know how to import Bootstrap into your code.

If you have any question about Bootstrap when studying or doing the assignment, please ask us in the Wechat Group or QQ Group.
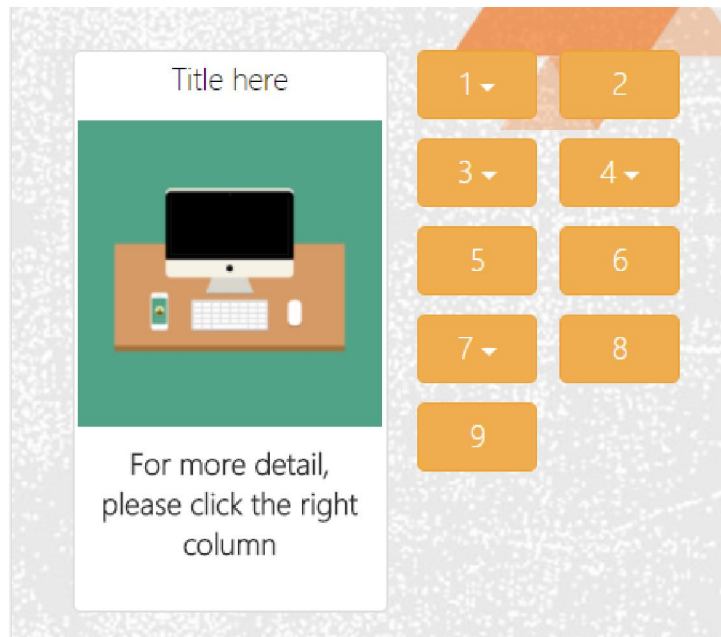

Week 2 Assignment about Bootstrap (Due: 5:00 pm October 15,2017)

Design a static webpage **similar to** the following one:

Requirement:

1. This webpage should be designed using Grid System [栅格系统]

2. You should consider the webpage responsiveness[网页自适应], in other words, your webpage can be viewed in any size of the screen without deforming.(Assume the smallest screen is iPhone5)

Example: Webpage viewed in iphone6

3.You can choose to replace the image in the example with any image.

4.The button with triangle icon in the right side means that you can extend this button.

Example:
